TAHMOOR NSW 2573

Dear Sir,

Re: Tahmoor Colliery Longwall Panel 26 – Further Extension of PSE Subsidence Monitoring Programme Approval

I refer to:

- (i) Tahmoor Colliery's subsidence monitoring programme for Longwall Panel 26, as approved on an interim basis by the Principal Subsidence Engineer (PSE) on 21 April 2011;
- (ii) Extension of PSE Subsidence Monitoring Programme Approval dated 29 June 2011;
- (iii) Letter titled "Tahmoor Colliery Longwall 26 Subsidence Management Plan Approval Condition 12" from Community Coordinator, Tahmoor Colliery dated 15 July 2011. The letter requests an additional extension of the current PSE subsidence monitoring programme approval for Longwall Panel 26, "for an additional 50 metres or 100 metres beyond the current approved 650 metres".

Pursuant to Condition 12 of Executive Director's SMP Approval of Longwall Panel 26 (File No. 09/3679-4, dated 2 March 2011), the subsidence monitoring programme (ref. (i) above) is approved on an interim basis.

This approval will cease to have force and effect when the extraction length of Longwall Panel 26 reaches 700 metres.

Yours faithfully,

Dr Gang Li
Principal Subsidence Engineer

18 July 2011
