TAHMOOR NSW 2573

Dear Sir,

Re: Tahmoor Colliery Longwall Panel 26 – Further Extension of PSE Subsidence Monitoring Programme Approval

I refer to:

- (i) "Tahmoor Colliery Subsidence Monitoring Programme for the Extraction of Longwall 26", Revision B dated June 2011, received by e-mail from Community Coordinator Tahmoor Colliery on 11 July 2011; and
- (ii) Letter titled "Tahmoor Colliery Longwall 26 Subsidence Management Plan Approval Condition 12" from Community Coordinator, Tahmoor Colliery dated 15 July 2011.

Pursuant to Condition 12 of Executive Director's SMP Approval of Longwall Panel 26 (File No. 09/3679-4, dated 2 March 2011), the subsidence monitoring programme (refs. (i) and (ii) above) is approved on an interim basis, subject to the following condition:

- 1 The leaseholder must ensure that adequate monitoring/inspections are conducted to ensure compliance with Condition 3 of Director of Mine Safety Operation's Approval of Infrastructure Management Plan – Main Southern Railway (File No. 11/3219, dated 22 July 2011).

Please be advised that, notwithstanding the above condition, ground surveys associated with the Redbank Tunnel must be reviewed by the leaseholder, in consultation with the Principal Subsidence Engineer. The said review must be conducted as soon as possible.

This approval will cease to have force and effect when the extraction length of Longwall Panel 26 reaches 880 metres.

Yours faithfully,

Dr Gang Li
Principal Subsidence Engineer
