Subject: Telstra Management Plan Tahmoor South LW S1A to LW S6A

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mark,

Attached final Telstra Management Plan dated 27th August 22 for the new Tahmoor South Project Area covering Longwalls LW S1A to LW S6A.

Mining is proposed to commence around 10th October 22

The proposed monitoring schedule for Telstra assets is included in Table 2 in the MP and CNS P/L will be monitoring the network and particularly the direct buried

IEN BRGO-PCTN cable F BRGO 101 crossing five of the six longwalls.

We have already established base line conditions for 1625nm trace monitoring for spare fibres in this cable.

If there are any issues you wish to discuss please contact me.

I have also attached a copy of the two cover sheets for sign off by Telstra on the second page.

If you could sign on behalf of Telstra and email the signed copy to Ross Barber Tahmoor Coal Project Manager Subsidence

Ross.Barber@simecgfg.com it would be appreciated

Ross will also sign for Tahmoor Coal and forward a copy to Telstra Network Integrity.

Thanks for your help to finalise the Management Plan.

Regards
Colin Dove
