Mine operations update

Tahmoor Coal Pty Ltd was placed into liquidation by order of the Supreme Court of NSW on 6 March 2026, with McGrathNicol appointed as liquidators.

Following an assessment of Tahmoor's business and operations, McGrathNicol made the difficult decision to significantly reduce Tahmoor's workforce to match the current operational requirements of the mine and minimise ongoing operating expenses. Approximately 90 employees have been retained to support critical functions of the business, ensuring the mine is maintained in a safe and compliant manner, including ongoing environmental monitoring.

McGrathNicol are currently undertaking a structured sale process in two stages, with non-binding indicative offers due by Friday 17 April 2026. Following evaluation of indicative offers, selected parties will be invited to participate in Stage Two, which includes due diligence, mine presentations and site visits, with submission of binding confirmed offers due by 18 May 2026.

Until the outcome and timeline for the completion of any sale is known, the restart of longwall mining operations remains on hold for the coming months.

If you have any questions or concerns during the liquidation process, please feel free to email tahmoorenquiries@tahmoorcolliery.com.au for assistance.

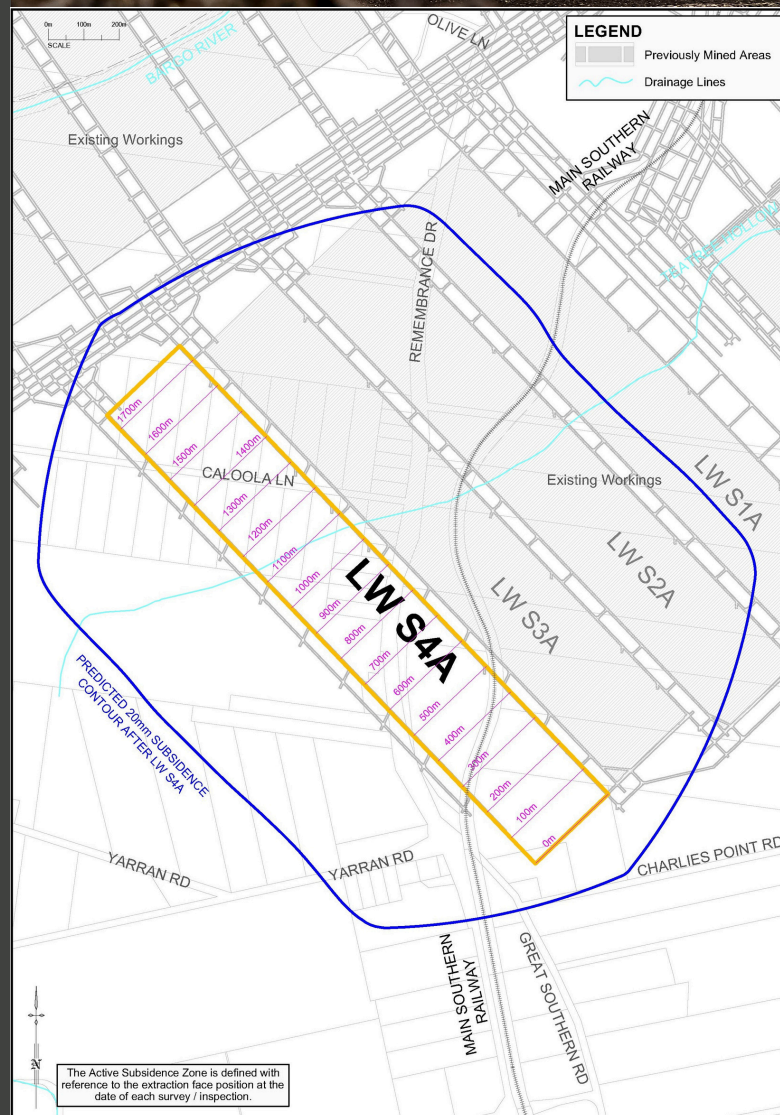

Figure 1 highlights the location of Longwall S4A in yellow.

- The blue line (predicted 20mm Subsidence Area) indicates the area predicted to experience subsidence from LW S4A mining.
- The grey shading depicts the previously mined areas.
